

QUALITY POLICY

Eclipse Magnetics Ltd specialises in the supply of magnets and the design, manufacture and installation of magnetic equipment, including separation equipment meeting ATEX requirements. Our products are supplied into many industries within the UK and overseas markets.

A key objective of the management of Eclipse Magnetics is to continually improve the company's quality standards by supporting and strengthening the Quality Management System activities. Emphasis is placed on ensuring customer satisfaction by the reduction of product nonconformities and customer complaints.

Our Quality Policy requires that we operate in compliance with the systems and procedures detailed in our Quality Manual which reflect the requirements of ISO 9001:2008 and ISO/IEC 80079-34:2011 (for ATEX products).

All personnel are aware of the operational procedures that involve them. The Quality Assessment Manager is responsible for maintaining the Quality Manual and the system.

A copy of the Quality Policy is displayed at points throughout the company. All employees are aware of its contents and importance.

A handwritten signature in blue ink, appearing to read 'J. Dargavel', is positioned above the printed name.

J. Dargavel
Managing Director
